Product Description

Printable Marble PVC Film for Kitchen Cabinet Plastic Cover Lamination

Product Description:

Our **pvc foil** is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its **durability**, **flexibility**, and **ease of processing**. Our pvc foil is available in a wide range of colors, patterns, and textures, and can mimic the look of natural materials such as wood, stone, fabric, or metal.

It is highly **versatile**, and can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and is suitable for a range of interior areas. In addition, our pvc foil is renowned for its resilience to deterioration and **strength**, making it ideal for high-traffic locations.

When it comes to **maintenance**, pvc foil requires little upkeep once installed. Usually it just has to be wiped down once a week with a moist cloth. Moreover, it is extremely **cost-effective**, making upscale aesthetics achievable without incurring related expenses.

A range of styles and finishes are available from manufacturers, providing the flexibility to tailor pvc foil to project specifications and **personal design preferences**. And it is commonly used in residential and commercial settings for **applications** such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Specifications:

We offer different thickness levels, ranging from 0.1mm to 0.5mm in thickness.

The widths available are 1260mm and 1400mm.

Lengths come in rolls of 100, 200, 300 or 400m.

Designs include wood grain, solid color, marble, brick and others.

Surface treatments available are matt, super matt, embossed, high gloss and soft touch.

We also provide support for OEM and ODM.

Applications:

Different Process for Different Application

Membrane Press (vacuum press): Membrane press is a process that helps to cover furniture on different kinds of wooden boards, such as MDF, particleboard and fiberboard with a thickness of 0.20-0.50mm and the width of 1260mm and 1400mm. It can also cover embossed board and cover all five surfaces at one time with a length of 100-300m/roll.

Wrapping Profiles: Wrapping profiles is a productive way to cover different kinds of profiles, such as wood profile, aluminum profile and PVC profile with a thickness from 0.12-0.18mm and width ranging from 40-1260mm and a length of 300-800m/roll. It is used for various purpose, including door frames, window sills, base channel and PVC ceiling.

Cold Laminating: This kind of process helps to cover different flat panels, such as wood panel, steel panel, aluminum panel and PVC panel with a thickness from 0.12-0.20mm and a width of 1240-1260mm. The length of the cold laminating is from 300-500m/roll. It is used for covering doors and furniture.

Hot Laminating: Hot laminating is a similar process to the cold laminating, but with a thicker covering of 0.16-0.30mm and width of 1260mm and length of 200-300m/roll. It is suitable for covering on PVC panel, steel panel and aluminum panel especially for doors, skirting, etc.

Self-adhesive: Self-adhesive is a process with a thinner covering, with a thickness of 0.10-0.20mm, width of either 600mm or 1220mm and a length of 5-50m/roll. It is suitable for any smooth surface, like furniture and indoor decorations.
