Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
- Waterproof: Yes
- Adhesive Strength: High
- Liner Paper: 80gsm, 100gsm, 120gsm
- Thickness: 0.08mm-0.15mm
- Surface: Glossy/Matte/Super Matte/Embossed/Soft Touch
- Durability: Excellent
- Material: PVC
- Highlight: **Wood Grain Self Adhesive Decorative Film ,
Matte Surface Self Adhesive Decorative Film**

Product Description

High Adhesive Strength Wood Grain Self Adhesive Vinyl Rolls Super Matte Surface

Product Description:

The **self adhesive pvc film** is mainly made of polyvinyl chloride, which is a synthetic plastic material that is known for its durability and flexibility. Additionally, a layer of pressure sensitive adhesive is added to the back of the film and the liner paper, and the paper is removed before the application.

The thickness of the film can be adjusted to suit the specific application and durability needs. Moreover, it comes in a wide range of finishes, from glossy to matte, and even textured finishes that might affect the appearance and feel of the material.

In terms of colors and patterns, it can be customized to various designs, such as wood grain, marble and brick. Ultimately, it is suitable for many different projects, including covering walls, furniture, and crafts, due to its easy installation and application.

Features:

Product Name: Self Adhesive PVC Film

Thickness: 0.08mm-0.15mm

Liner Paper: 80gsm, 100gsm, 120gsm

Material: PVC

Durability: Excellent

Waterproof: Yes

Ideal for: self adhesive furniture film, self adhesive vinyl rolls, vinyl contact paper

Technical Parameters:

We offer customized thickness at 0.1mm and 0.12mm to meet different customer demands. Furthermore, the width of our products include 1220mm and 600mm. We provide 50m/roll and 10m/roll of length for different interests. Our design features wood grain, solid color, marble, brick and more. A series of surface treatment options are available with matt, super matt, embossed, high gloss and soft touch. We always supply OEM and ODM services.

Applications:

Self-adhesive PVC film is a great option for a variety of projects, such as home improvement, crafts, and signage. Here is a general guide for applying self-adhesive PVC film:

Materials you'll need:

Self-adhesive PVC film

Clean, smooth surface to apply the film to (e.g., furniture, walls, windows, etc.)

Measuring tape or ruler

Sharp utility knife or scissors

Squeegee or credit card

Clean cloth or sponge

Spray bottle with soapy water (optional)

Steps for application:

Prepare the surface: Ensure that the surface you plan to cover with the self-adhesive PVC film is clean, dry and smooth. Remove any dust, dirt or imperfections. If the surface is dirty, clean it thoroughly and let it dry completely.

Measure and cut: Measure the dimensions of the surface you want to cover and add a few extra inches to each side to allow for trimming.

Cut the film to desired size with a sharp utility knife or scissors.

Peel off the backing: Carefully peel back a few inches of the backing paper from one of the edges of the PVC film. Avoid touching the adhesive side to prevent fingerprints and dirt from sticking.

Apply the film: Begin applying the exposed adhesive side of the PVC film to the surface. Start at one corner or edge and align it with the surface. As you apply, gradually peel off more of the backing paper, smoothing the film into place as you go. Use a squeegee or credit card to help remove any air bubbles and ensure that the film is applied even.

Smooth out bubbles: If you notice any air bubbles trapped under the film, use the squeegee or credit card to push them out towards the edges. Work from the center outward to completely expel the bubbles.

Trim excess: Once the film is applied smoothly, use a utility knife or scissors to trim any excess film along the edges. Be careful when cutting to avoid damaging the surface underneath.

Finish and clean: Go over the entire surface with a clean cloth or sponge to ensure that the PVC film is securely adhered and free from any air bubbles or wrinkles. If you used soapy water during the application process, wipe away any excess water or soap residue.

Final inspection: Inspect the surface to ensure that the film is firmly in place and free from any imperfections. Be sure to lift and reapply the film if an issue arises.

When working on specific applications, follow the instructions provided by the manufacturer to ensure a professional looking result. If done correctly, self-adhesive PVC film is a great choice for many projects.

Customization:

Welcome to Realsun Deco, the leading supplier of Self Adhesive PVC Film in Foshan, China. Our Self Adhesive PVC Film has a high adhesive strength and excellent durability, making it the perfect choice for all of your projects.
