Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Thickness: 0.08mm-0.15mm
- Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
- Durability: Excellent
- Material: PVC
- Liner Paper: 80gsm, 100gsm, 120gsm
- Adhesive Strength: High
- Surface: Glossy/Matte/Super Matte/Embossed/Soft Touch
- Adhesive: Acrylic Pressure Sensitive Adhesive
- Highlight: **Self Adhesive PVC Film Water Resistant, Quartz Design Self Adhesive PVC Film, Quartz Design pvc self adhesive foil**

Product Description

Quartz Design Self Adhesive PVC Film - Water Resistant For Kitchen Counter Top

Product Description:

The self adhesive pvc film is made primarily of polyvinyl clohrride, a synthetic plastic material that is known for its durability and versatility. We add a layer of pressure sensitive adhesive onto the back of the film along with a liner paper that is removed before application. This adhesive is designed to securely bind to a variety of surfaces, such as glass, metal, plastic, and wood.

The thickness of the self adhesive pvc film can be customized to fit a particular application or durability need. Additionally, finishes available include glossy, matte, satin, and textured finishes to give the material an entirely different look and feel.

Within our selection, there is a wide array of colors and patterns to choose from, such as wood grain design, marble design, and brick design. Our self adhesive pvc film can be applied to walls, furniture, and other surfaces for both practical and craft and DIY applications.

Features:

Product Name: Self Adhesive PVC Film

Waterproof: Yes

Liner Paper: 80gsm, 100gsm, 120gsm

Surface: Glossy/Matte/Super Matte/Embossed/Soft Touch

Material: PVC

Size: 122cm*50m, 60cm*10m

Ideal for contact paper for furniture, adhesive contact paper, self adhesive foil, self adhesive paper

Technical Parameters:

The thickness of our product is between 0.1mm and 0.12mm. And we currently provide two widths, 1220mm and 600mm. You can also select the length of our product, either 50m/roll or 10m/roll.

By the way, we have various designs for you to choose, such as wood grain, solid color, marble, brick and so on. The surface treatment of our product can be matt, super matt, embossed, high gloss and soft touch.

Not to mention, we also provide OEM, ODM and door-to-door services, for your convenience.

Applications:

Self-adhesive PVC film is a versatile material used for various applications, including home improvement, crafts, signage, and more. Here's a general guide on how to apply self-adhesive PVC film:

Materials you'll need:

Self-adhesive PVC film

A clean, smooth surface to apply the film to (e.g., furniture, walls, windows, or any other suitable surface)

A measuring tape or ruler

A sharp utility knife or scissors

A squeegee or a credit card

A clean cloth or sponge

A spray bottle with soapy water (optional)

Steps for application:

Prepare the surface: Ensure that the surface you plan to cover with self-adhesive PVC film is clean, dry, and smooth. Remove any dust, dirt, or imperfections. If the surface is dirty, clean it thoroughly and let it dry completely.

Measure and cut: Measure the dimensions of the surface you want to cover and add a few extra inches to each side to allow for trimming. Cut the self-adhesive PVC film to the desired size using a sharp utility knife or scissors. Be precise in your measurements and cutting to ensure a proper fit.

Peel off the backing: Carefully peel back a few inches of the backing paper from one end of the PVC film. Avoid touching the adhesive side to prevent fingerprints and dirt from sticking to it.

Apply the film: Begin applying the exposed adhesive side of the PVC film to the surface. Start at one corner or edge and align it with the surface. As you apply the film, gradually peel off more of the backing paper, smoothing the film onto the surface as you go. You can use a squeegee or a credit card to help remove any air bubbles and ensure a smooth, even application.

Smooth out bubbles: If you notice any air bubbles trapped under the film, use the squeegee or credit card to gently push them out towards the edges. Work from the center outward to expel the bubbles completely.

Trim excess: Once the film is applied smoothly, use a utility knife or scissors to trim any excess film along the edges. Be cautious when cutting to avoid damaging the surface underneath.

Finish and clean: After trimming, go over the entire surface with a clean cloth or sponge to ensure that the PVC film is securely adhered and free from any air bubbles or wrinkles. If you used soapy water during application, wipe away any excess water or soap residue.

Final inspection: Inspect the surface to ensure that the PVC film is securely in place and free from imperfections. If you encounter any issues, gently lift the film and reapply as needed.

Self-adhesive PVC film can be used for a wide range of purposes, so make sure to follow the specific instructions provided by the manufacturer if you have a unique application in mind. Proper surface preparation and careful installation are key to achieving a professional-looking result.

Customization:

Self Adhesive PVC Film
Brand Name: Realsun Deco
Place of Origin: Foshan, China
Minimum Order Quantity: 3000m/model
Price: Negotiable
Packaging Details: Pack in roll
