Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Service: OEM, ODM
- Packing: Pack In Roll
- Width: 1260mm, 1400mm
- Thickness: 0.10mm-0.50mm
- Feature: Non-toxic/ Anti-Flame/ Moisture-proof
- Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, Etc.
- Length: 100m-400m
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Highlight: **Flame Retardant Pvc Vacuum Press Film, 1400mm Pvc Vacuum Press Film**

Product Description

Flame Retardant Moisture Proof Pvc Vacuum Press Film Non Toxic Wrap Roll 1260mm/1400mm

Product Description:

Explore the World of PVC Foil

Composition and Quality

Our premium PVC foil is crafted from Polyvinyl Chloride (PVC), an artificial plastic polymer well-regarded for its outstanding tensile strength, flexibility, and ease of processing. This robust material constitutes the core of our enduring and versatile foil product.

Elegant Appearance

Boasting a spectrum of colors, intricate patterns, and authentic textures, our PVC foil is adept at mimicking the aesthetics of natural substances like wood, stone, fabric, and metal. Despite its cost-effectiveness, it does not compromise on delivering a luxe finish to any interior space.

Unmatched Adaptability

The foil's adaptability shines across various applications including walls, doors, cabinets, and pieces of furniture. Its capacity to seamlessly adapt to different contours and orientations makes it an exceptional choice for diverse interior enhancement projects.

Durable by Design

Known for its resilience, Realsun Deco PVC foil withstands wear and tear remarkably well. It's especially suited for areas with heavy usage due to its long-lasting nature, promising an enduring appeal with minimal upkeep.

Low-Maintenance Living

Once applied, our PVC foil requires minimal maintenance to retain its allure. A simple wipe with a damp cloth weekly suffices, freeing up time and effort for other important tasks in your routine.

Cost-Effective Choices

An attractive feature of our decorative PVC foil is its affordability compared to its natural counterparts. It empowers you to fashion opulent designs and environments without weighing heavily on your budget.

Customized Creations

Reflecting personal taste or meeting project specifics is a breeze with the diverse array of styles and finishes our manufacturers provide. This versatility enables tailor-made solutions that cater to various design inclinations and project demands.

Versatile Application

The utility of decorative PVC foil extends to wall paneling, furniture coverings, retail fixtures, and the surfaces of interior doors, not to mention kitchen and bathroom cabinet facades. Its use is prevalent in both residential domains and commercial spaces, adding a touch of elegance and functionality wherever applied.

Features:

Product Name: PVC Decorative Film

Service: OEM, ODM

Design: Wood Grain, Marble, Brick, Stone, and more

Length: Ranges from 100m to 400m

Usage: Lamination, Wrapping Machine, Vacuum Membrane Press

Feature: Soft touch PVC foil

Application: PVC vacuum press film

Functionality: PVC membrane for furniture

Packing: Pack in Roll

Applications:

Different Lamination Processes for Various Applications

1. Membrane Press (Vacuum Press)

Specifications: Thickness range between 0.20-0.50mm, width available at 1260mm and 1400mm, with the length varying from 100 to 300 meters per roll.

This technique is ideal for covering medium-density fiberboard (MDF), particleboard, wooden board, and fiberboard. It is commonly used for doors, kitchen cabinets, wardrobes, and other furniture pieces. The press has the added capability to cover embossed boards and to simultaneously cover five surfaces.

2. Wrapping Profiles

Specifications: Thickness ranging from 0.12-0.18mm, with widths from 40 to 1260mm, and roll lengths from 300 to 800 meters.

The wrapping profiles are designed to cover a variety of profiles including those made of wood, aluminum, and PVC. These are extensively used for door frames, window sills, base channels, PVC ceilings, and similar applications.

3. Cold Laminating

Specifications: A thickness of 0.12-0.20mm and width range of 1240-1260mm; these are provided in rolls of 300 to 500 meters in length.

Cold laminating procedure is applied to flat panels, such as wooden, steel, aluminum, and PVC panels. It serves the purpose for enhancing the aesthetics and protection of doors and furniture surfaces.

4. Hot Laminating

Specifications: Available thicknesses are within 0.16-0.30mm, with a consistent width of 1260mm, and roll lengths range from 200 to 300 meters.

Hot laminating is commonly used on PVC panels, steel panels, and aluminum panels. The applications mainly include doors, skirting boards, and related products.

5. Self-adhesive

Specifications: The material comes in thicknesses of 0.10-0.20mm and widths of either 600mm or 1220mm. The lengths of these rolls vary between 5 and 50 meters.

Self-adhesive laminates can be easily applied to any smooth surface, making them particularly versatile for use in furniture and indoor decoration projects.
